Every step in life counts - Born in a family somewhere in the world is just the start it can be good it can be bad - I consider my start as a warm bath - slowly cooling down to step out of it at the right moment - facing the world embracing it fully - accepting sadness and happiness equally. After 10 countries and many challenges - my journey brought me HERE at this crossing point of my life - where I knew and sensed the momentum was there and ready to start the new chapter. Your transformation coaching has been giving me the exact energy I was looking for and will guide me during the challenges to come - "Breaking the plank" emphasizes my confidence that the future feels GOOD!!

What an exhilarating, life altering experience. The wisdom, encouragement and sheer joy of experiencing myself transforming is indescribable. This time has allowed me to expand myself both internally & out. With this enlightenment has come the courage and the belief that I am whoever I want to be & have the knowledge & techniques & skills to grow & alter not only myself but others around me. Included in this is the feeling of oneness within, without and with all of creation. I am inspired to live to my highest potential & create my life & world just by truly BEING.

Burk is an excellent trainer. Passionate, he inspired me on what to focus in my life.

The theory is supported with practical exercises. His techniques empowered me and give me wings to tackle my future.

The best technique for me was to get rid of my inner conflict. It has released a lot of deep emotions. Unforgettable!

This course gives you concrete tools to change your life and the life of others.

Thank you 😊

Doing the refresher course was the best decision I made at the beginning of the year, compared to New Year's resolution, which I don't believe in. Between the first course and the second one, I had to undergo a journey in order to understand what it is that I will be doing as a Transformation Coach, and how I will impact the lives of others, as well how I am going to change lives of others for the better. This course confirms my purpose of existence. I gained more insight the second time around and it was needed as the step forward to starting a practice. I am now ready and compared to a year ago, I was not ready and had to learn a few life lessons first, or I would not have been the best for another person or a client. I have come to a point where I am giving it my all. I decided to do the Masters course even before I had to experience more life and learn more lessons the past year,

because it would be MY journey and a journey for myself and my soul. Even then, it will help me to live my purpose, which is to grow and educate people and change people in a positive way and hoping that each person I make a difference to, would in turn make a positive difference to others and it would carry on.

This course is the start of my legacy I am going to leave behind as a Transformation Coach when I die one day. The Masters is going to be the start of a personal legacy for me to become the Master of my own life!

From losing work, being robbed, in an accident and more ..... I am TRULY content - with life and look forward to more!

Thank you  
I appreciate it.

I have come to the realisation that my purpose is to inspire people. It's going to take some working on myself but I know will get there using all the tools & skills learnt in this training and in the Masters Course.

This was all also, a very good reminder and kick up the bum again to get me moving in the right direction. Thank You!!!

In love & light

Debbie
