From the time I received my pre-study pack and I started the process of learning I became completely & utterly captivated. I just wanted to learn and absorb more and more. Everything just resonated with me and I loved the exercises I had to do in Pre-Study.

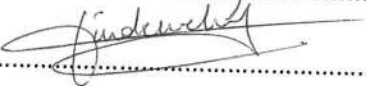

Then the actual 5 day training course was simply mind-blowing and even more captivating than the Pre-Study. Each day felt more liberating than the day before and whilst challenging emotions surfaced, the processes and techniques and just listening to my being and actually feeling acknowledging the feelings, took the whole experience to a higher level of learning and personal growth. The feelings of empowerment, liberation, new discovery of self and simply being in the moment will remain ingrained in me. It has been an amazing investment in myself, my life and the learnings truly unbelievably valuable. I now just want to share all this with others!

This course was truly life changing in the way that it keeps me focused & positive. I feel like I am truly the creator of my own reality and nothing can stop me. It took me 42 years but I finally found my direction in life & this is what I really want to do. The course taught me concrete techniques, which are fairly easy to apply & which have quick results, and that's one of the things I love about it. I feel empowered, have been taught to think big. That the only limitations in life are the ones your mind give you. By applying The Transformation Coaching System I know I will be able to not only better myself, but also offer help to a lot of other people, and this while earning a substantial income. I am a coach by heart, and this course made it possible for me to feel confident enough to bring it to practice & really make a difference in the world. Thank you Burk & Isobel, forever grateful.

My experience coming to the transformation coaching academy has been revolutionary. Before deciding to come to do the course I had no idea what I had been holding onto. I thought I'd be coming to get certified as a life coach and that was the end of the story. It is only when I got here, going through the program and the techniques did I realise how much of baggage I had been carrying with me everyday. The powerful feeling that I left with as if anything were possible is something I didn't even know I was lacking. I considered myself to be free of other peoples negativity until I came here. I came to start a business but ended up learning so much about myself which could never be learnt anywhere else.

I have now completed the course twice, with the second time being a refresher. A year ago I found the course both fascinating & inspiring, this year it was even better. Burk continues to be enormously motivational & inspirational but now as I become more open to these incredible techniques I am able to fully appreciate and benefit from all the knowledge and hard work that has gone into the creation of the material. A massive thank you to Burk & Isobel, keep changing the world for the better. Jurgen

This is a fast paced course full of very usefull information. Any normal pesson will be able to follow it. The material is wel structured ~~to~~ and easy to follow. The handouts are well prepared and give a profesional feeling.

This course is aimed at teaching and there is a ^{good} ~~well~~ balance between lecturk and the actual application of the material. It is difficult to think that someone can do the course and not be able to apply any of the techniques. Some techniques are difficult but there is ample time spend demonstraly and coaching about each technique.

This course is not for the faint of heart but is defferintly recommended. It is worth the effort to persevere!!
