The programme changed my life in a tremendous way. It helped me let go of the emotions which had been built up for almost a life time, that was by far an extra ordinary experience. I can easily say I feel well in perfect balance and positively aligned mentally and emotionally. I am empowered to follow through and reach my goals.

I have to say, Burk and Isobel are truly much gifted in what they do. They are so much passionate about it such that they effortlessly and effectively pass it on to those they coach. I definitely got value for money, what a life changing experience.

I came into the training 5 days ago looking to learn some techniques & tools to help other people overcome their obstacles. What I got far outweighed what I signed up for. For many years I have been frustrated because I "know" who I was, and I thought I had the answers, but nothing I desired really manifested in the way I thought it should. I know now that it was a matter of inner conflict, and Burk has helped me clear the thoughts I have been limiting myself with. I feel completely in charge of my own destiny now, and believe, really believe, that I will be able to shine a light for other people.

I have suffered from severe anxiety since I can remember, which was at about 3 or 4 years old. This turned into severe depression and the first time I thought about committing suicide, I was only 13 years old. This has had a devastating effect on my life. Although I managed to finish school, get a degree and build a career in the corporate world, I was desperately unhappy and over the years, was diagnosed with various stress-related diseases. Three years ago I made the decision to stop working as I knew I could not continue my life like that. I was barely able to get out of bed, and had no confidence that I could achieve any of my dreams. I started searching for answers as to how I was going to heal myself, as I realised that conventional medicine was not going to do so. My body ~~did~~ started to heal, but I could still not break through the barrier of negative thought patterns that kept me small and unable to move forward. The last 5 days has truly been a miracle experience. My vision for my future is clear. I feel positive, I feel confident and most of all I ~~am~~ am excited about what the future hold. The world around me has come into bright, colourful focus. Thank you Burke + Tsobell! I cannot wait to start the amazing, exciting and abundant journey that lies ahead of me!!

This 5 day experience has almost been beyond words. I have wandered around most of my life feeling disassociated from reality and without a purpose. The current state of the planet for all living things has been an ~~area~~ immense source of inner pain for me since I was a child and I have always been aware of a mission to anchor more light on this planet and ease the suffering. This course has finally eased my own suffering in immeasurable ways and now I cannot wait to assist others to do the same and anchor a new, more loving, more compassionate paradigm on earth.
